Sarim Ali

Devops Engineer at Shomi

sarim_aali@hotmail.com

Summary

Devops and System Administration in a wide variety of business applications. Particularly interested in security and automation. Excellent people skills and love meeting and interacting with new people on a regular basis. Always interested in computer security and system administration openings.

Experience

Devops Engineer at   shomi™

June 2015 - Present (10 months)

  - Chef - AWS (Cloud Formation, TeamCity, Code Deploy, S3, AMI, CLI) - VMware - IIS - NodeJS - CentOS - F5 LTM

System Administrator at   eyereturn marketing

March 2014 - April 2015 (1 year 2 months)

  • Create a IDS using puppet scripts and deploy across existing systems • Assist in a database migration project moving assets from one data center to another • Using Amazon EC2 instance as a external interface to check for vulnerabilities in existing systems and for external monitoring • Create detailed documentation for both new and existing environments • Troubleshoot outages including after-hours and on weekends • Author scripts to automate systems administration tasks, networking, monitoring and application deployment • Leverage and contribute to in-house developed Puppet scripts for the automation of system and application deployment • Collaborate with the team and assist in a NY expansion project; helping from designing to shipping • Analyze / Troubleshoot hadoop, hbase, and cloudera implementations and increase performance and manageability • Install and stage new servers • Created a 2 factor authenticated Wi-Fi system with commodity grade hardware • User support across all platforms • Helped quickly patch security vulnerabilities like Bashbleed and Heartbleed • Helped create a brand new DevOps team at eyereturn by leveraging vagrant and puppet to create a dynamic UAT environment • Helped network and wire Markham offices

Robotics Instructor & System Administrator at   The THINNOX Academy

October 2013 - September 2014 (1 year)

  • Deliver professional and educational presentations on a daily basis to students of ages 7-16, and sometimes parents • Conduct classes for basic and intermediate level robotics utilizing NXT Mindstorms 2.0 and NXT Mindstorms IDE • Active Directory management and updating many users using batch scripts • Optimizing and upgrading server • Only IT professional in the entire facility; I have to be easily approachable • Maintain all hardware in the whole facility and upgrade if necessary

Mobile Audio - Product Expert at   Future Shop

June 2013 - September 2013 (4 months)

   • Deliver outstanding service to every customer • Troubleshoot & resolve complex technical problems or
   issues for customers • Resolve customer issues and complaints in a positive manner that builds business
   & customer loyalty while adhering to Company policies & procedures • Suggest additional products and
   services to enhance the customer's car audio experience • Learn up to date knowledge about Car Audio from
   websites, forums, peers and formal training sessions • Boosted customer turnout by creating a HTML based
   email blast during the annual VIP sale event, a first in this locations history

System Administrator/IT support at   NAMF

June 2010 - January 2011 (8 months)

   - In a group environment we established optimized and Skype® enabled workstations for each faculty
   member and classrooms - Established a easy to use parental control system - Develop a new and teacher
   friendly Macros enabled Excel mark book application - Comprehensive LAN setup, this required extensive
   analysis of old wiring and research for a cost effective upgrade - Photoshop and Illustrator used to make
   several flyers and newsletters - Independently updated and administered entire site
